The VT60S is a handheld industrial TPMS engineering tool for manufacturing facilities, on assembly lines and rework stations, or when preparing vehicles for export or domestic dispatch.

Built to meet OEM specifications and requirements, it features TPMS sensor activation and TPMS sensor state manipulation functions, for production and testing.

Its ergonomic design, plus the optional gun switch and long nose antenna, facilitates the technicians' work when triggering TPMS sensors. The VT60S Bluetooth permits to wirelessly transmit TPMS sensor ID's to a local PC or to the factory network for central data processing.

VT60S FEATURES

- Software built to OEM specifications and requirements
- Features TPMS sensor activation and reading, testing
- Sensor state manipulation (ship, park, test, transmission, etc.)
- Data transfer via RS232, USB, Bluetooth or optional OBD2 module
- Optional gun switch and long nose antenna
