Section E – Updating VT55 (9/12)

## Section A - General Description of the ATEQ VT55

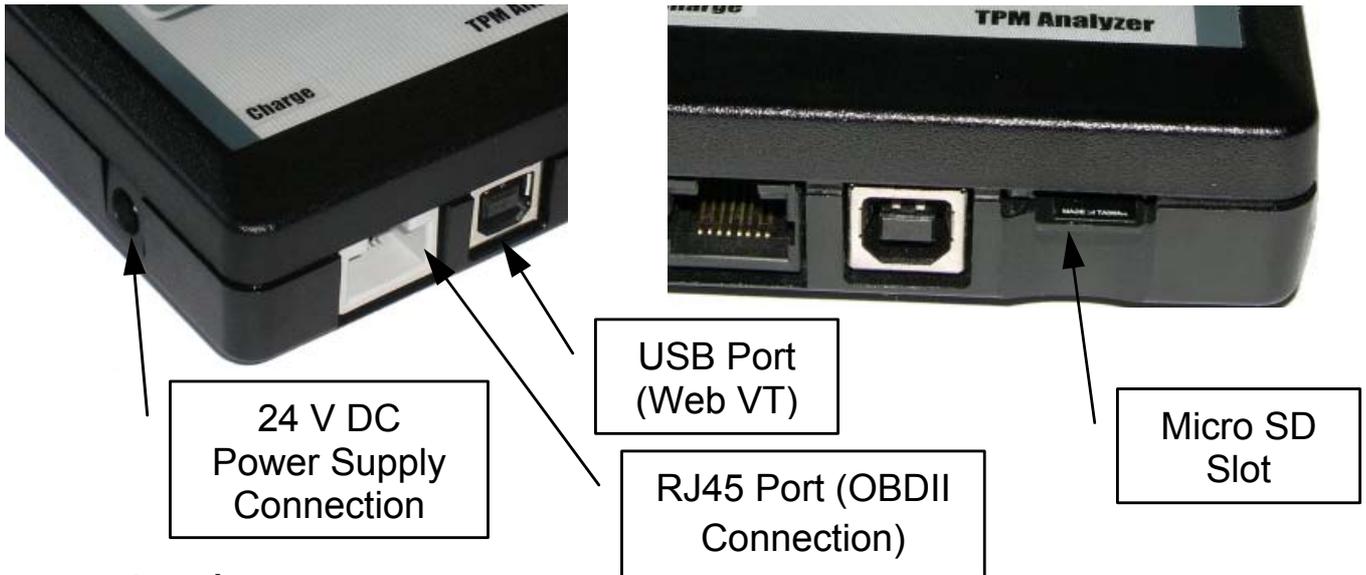

The principle of this instrument is to awaken and then retrieve data from smart valves mounted on vehicle wheels, in order to check their identifiers.

The instrument interacts with the smart valves to assist technicians service Tire Pressure Monitor Systems (TPMS). VT55 may be equipped with OBDII programmer to reset TPMS for import vehicles.

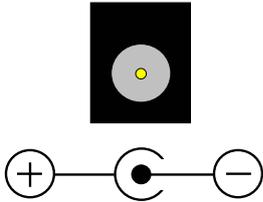

### Front face

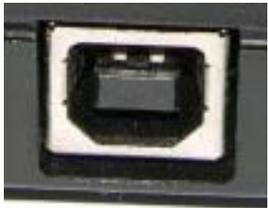

# Connectors

## Power Supply connector

	<p>Power supply connection to the tool for charging the internal battery.</p> <p>24 V DC Supplied with the tool.</p>
--	--

## USB connector

	<p>The USB connection allows software updates to be installed onto the tool using the WEB VT program. TPM sensor results can also be printed using this program.</p>
---	--

## RS232 connector

	<p>The RJ45 connector use of the OBDII module.</p>

## Section B - Triggering Sensor(s)

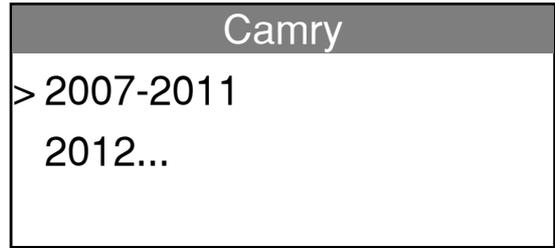

### B.1 - Testing a TPM Sensor

<p><b>Step 1</b> – Select the "VEHICLE SELECTION" menu and confirm selection with the  key.</p>	
<p><b>Step 2</b> – Select the vehicle brand on the screen by using the  or  keys and confirm selection with the  key.</p>	
<p><b>Step 3</b> – Select the "READ SENSOR" menu on the screen by using the  or  keys and confirm selection with the  key.</p>	
<p><b>Step 4</b> – Select the vehicle model by using the  or  keys and confirm each selection with the  key.</p>	

**Step 4** – Select the year and the number of wheels by using the

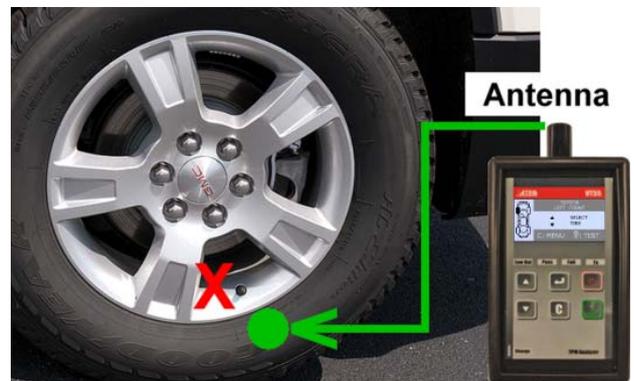

each selection with the

**Step 5** - Hold the tool within a few inches from the TPM sensor.

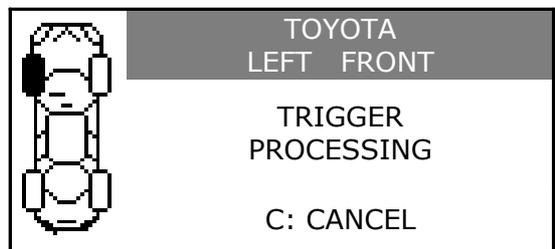

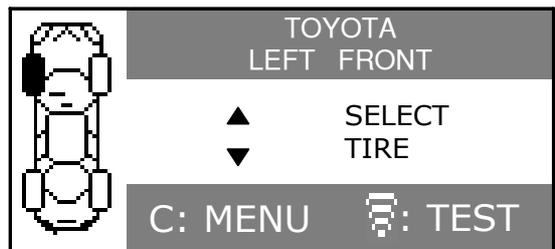

**ALWAYS** position the antenna on the tire sidewall.

**NOT over the valve stem**

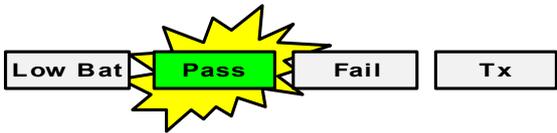

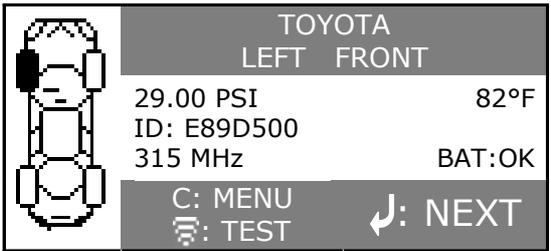

Some sensors are banded to the wheel and can be located 180° opposite the valve stem. (Refer to owners manual).

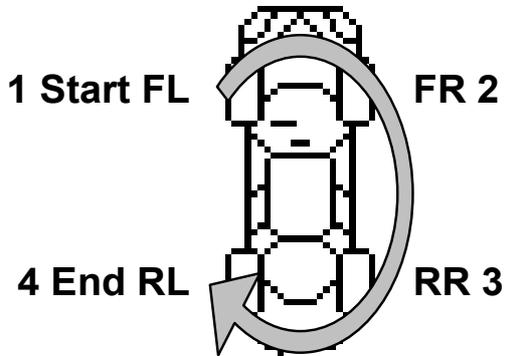

**Step 6** - Press the  key. The tool will begin to send LF trigger and the TX light will flash. Depending on the sensor, the tool will activate the sensor on the first or last step. Each step identifies the number of valve types used on the vehicle brand.

**Step 7** – The tool will vibrate/beep after receiving the sensor information. The tool will display the sensor ID, pressure and sensor state of the valve that is triggered. If the tool does not receive the correct information, the fail LED will illuminate and you can restart the trigger sequence by pressing the  key again.

**Step 8**- Follow the same procedure for the rest of the three or four wheels by pressing the  key and then  key. Keep the order in clockwise rotation. (Refer to vehicle owners manual or other reference guides for TPM reset procedure).

**B.2 - Results Description**

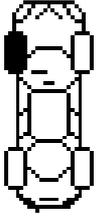

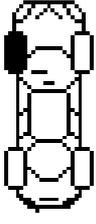

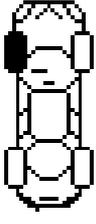

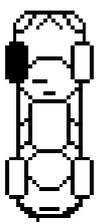

The picture below is an example of a valve data communication result:

Vehicle brand	TOYOTA	Internal wheel Temp.
Tire internal pressure	29.00 PSI	82°F
Valve identifier	ID: E89D500 315 MHz	Valve battery status
	BAT:OK	When blinking Instrument is ready to test again
	C: MENU ↵: TEST	
	↵: NEXT	

**Note:** The VT55 will identify the sensor information that is transmitted. Not all sensors transmit every piece of information shown.

## Section C – Using OBDII Function

### Following Step 8 in Section B.

<p>Once all the sensors are triggered, plug the <b>OBDII</b> module to the ATEQ VT55 using the RJ45 port.</p>	
<p>This screen message is displayed.</p>	 <p>TOYOTA Camry ↶: ECU Relearn C: ABORT</p>
<p>Plug the ATEQ OBDII module to the vehicle OBDII port. Turn ON the ignition key and keep the engine Off.</p> 	 <p>TOYOTA Camry CONNECT OBD2 MODULE THEN TURN IGNITION ON C: ABORT</p>
<p>The VT55 will connect to the ECU and transmit valve information. The message <b>SUCCESSFUL TRANSFER</b> appears when the sensor information has correctly transferred into the ECU. Disconnect the OBDII module from the vehicle.</p>	 <p>TOYOTA Camry CONNECTING... C: ABORT</p>  <p>TOYOTA Camry CONNECTED TRANSFER OK VERIFY OK SUCCESSFUL TRANSFER C: ABORT</p>

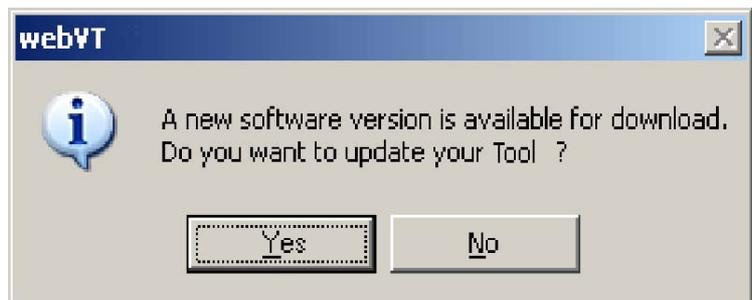

## Section D – Installing USB Drivers and Web VT PC

### Suite

- 1) Connect the TPMS TOOL to the USB port of your PC to properly install the drivers. See Fig. 8.
- 2) Insert the CD, supplied with your tool, into the PC drive and click on the **Web VT** icon to start the program.
- 3) A screen will appear that says “**Welcome to the Install Shield Wizard for Web VT.**” Click “**Next >**”
- 4) A window will appear to choose destination location, click “**Next >**”
- 5) Click “**Yes**” when the following window appears. See Fig. 9.
- 6) Click “**Finish**” when the **Web VT** installation is complete.

### New Software Upgrades

As new software becomes available, you will be alerted on your computer monitor.

**Note:** To order annual update software part number, please see your dealer for availability and pricing.

## Section E – Updating VT55

### 1.1. USB INTERNET OPTION UPDATING

Before updating, ensure that the battery charge is full.

- 1) Connect the USB cable from the **TPMS TOOL** to the **PC**, and turn the device on.
- 2) Start **Web VT** software.
- 3) A screen will appear indicating “**Update Device**”.
- 4) You can also print “**Valve IDs**” from here as well.
- 5) Press “**Yes**” to update to the latest software version. Update will take several minutes to complete and the status bar will indicate the percentage of update completed.

**Warning!** Do not disconnect the TPMS TOOL from the PC or turn off the PC during the update process. This may result in serious damage to the tool.

### 1.2. MICRO SD CARD OPTION (NON INTERNET) UPDATING

Before updating, ensure that the battery charge is full.

- 1) Place the **Micro SD card** into slot, pins facing upwards.
- 2) Turn the **TPMS TOOL** on and go to Main Menu.
- 3) Scroll down to **TPMS TOOL** Update and press enter.
- 4) Scroll down to **YES** and press enter.
- 5) You will now see File Selection, press the  key.
- 6) The tool will now update its software version.
- 7) When installation is complete, the tool will automatically turn off.  
**Remove the Micro SD card.**
- 8) Turn the **TPMS TOOL** on. The latest software version will be displayed on the screen.

**Warning!** Do not turn off the TPMS TOOL or extract the SD card during the update process. This may result in serious damage to the tool.

### TRP Test Box

- Pre-Test TPM sensors before you mount them to the tire.
- Ensure your gauge pressure matches the “Tire Relative Pressure”.
- Save valuable time.

### CDP 40 Pressure Calibrator

- Calibrate pressure gauge.
- Verify TPM pressure reading with pressure gauge.
