

QUICKSTART GUIDE

RELEARN INSTRUCTIONS

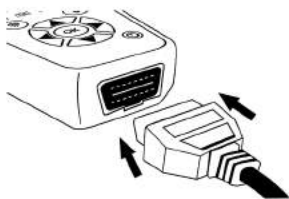

- 1 Select "TPMS", then select the vehicle's Make, Model, and Year.

- 2 Scan each sensor on the vehicle, starting with the left front sensor.

- 3 First, plug the OBD Quick Connect cable into the tool, then into the vehicle.

- 3 Select the "Relearn" Icon and press OK. The tool will display "Successful Relearn" when the process is complete.

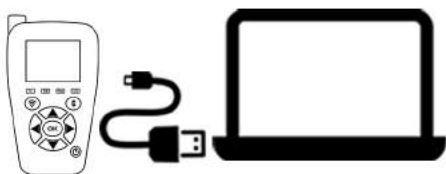

UPDATING THE TOOL

1 Visit:
webvt.ateq-tpms.com
to download the WebVT update software

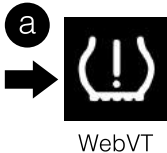

2 Open the WebVT.exe installation file. Follow the installation instructions

3 Connect the tool to your PC with the power ON

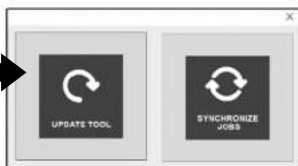

Open the WebVT software. Once the software loads, a pop-up will appear. Select “Update Tool”

4

b

5

The software will begin the update process. This process may take several minutes. **DO NOT** unplug or turn off the tool during this process. Once the update is complete, a pop-up will appear that your tool is now up to date.
