VT67

TABLET-BASED, COMPLETE TPMS & TIRE MANAGEMENT DIAGNOSTIC TOOL

With interactive menus, complete TPMS diagnostic capability, and even built-in support, the VT67 will completely re-imagine the way technicians diagnose and validate TPMS systems. The tool boasts over 30 features and functions, as well as a built-in camera to document any vehicle issues, which can then be added to a complete TPMS report and emailed to the customer.
